FIG. 4

FIG. 5

Diagram illustrating a geometric structure, possibly a cross-section of a material or a mechanical component. The structure is a triangle with vertices labeled a (top) and b (bottom left). The base is horizontal. A vertical line segment is labeled 128 . A line segment from vertex a to the base is labeled 126 . The angle at vertex a is labeled α . The angle between the vertical line 128 and the line segment 126 is labeled β . The angle between the base and the line segment 126 is labeled θ . A right angle symbol is shown at vertex b . A line segment labeled 124 is shown inside the triangle, and another line segment labeled 126 is shown on the right side of the triangle. A coordinate system is shown at vertex b with a horizontal axis and a vertical axis labeled z .
